

Airmaster® BlueLine Digital Odor remover made in Sweden

Airmaster BL 3000/6000-D Remove odors caused by fire, water, refuse and pets.

Where is Airmaster used

Airmaster can be used as a portable unit for professional odor removal. The unit is very useful after fire- and water damages, and for odor removal in apartments and industries.

Wall mounted Airmaster can be used in waste rooms, ventilation, air-conditions.

How Airmaster ozone generators works

Airmaster odor eliminators produce ozone, a special form of oxygen which is sometimes called activated oxygen. Ozone is a powerful oxidizing agent which acts on organic matter including odors, airborne microbes and molds, to neutralize smells and help reduce airborne pathogens. The end products of the oxidation are mainly carbon dioxide and water which means that Airmaster is environmentally friendly.

Digital operating with timer

Through the digital display Airmaster can easily be operated.

The amount of ozone can be regulated between 0 – 100%.

Three different timer settings:

24 hour timer - interval timer - on/off timer

Scan to watch
the product film.

Technical data	BL 3000-D	BL 6000-D
Ozone production	0-3000 mg / hour	0-6000 mg / hour
Fan capacity	116 m ³ / hour	116 m ³ / hour
Basic	Ceramic plate	Ceramic plate
Timer	Yes	Yes
Hose fitting	No	No
L x W x H	270 x 180 x 160	270 x 180 x 160
Weight	2,2 kg	2,3 kg
Consumption	34 W / 100-230 V	38 W / 100-230 V
Chassis	Stainless steel, blue	Stainless steel, blue
Airmaster works in ambient temperatures of +1° - +35° C		
Please note! Ozone generators should be used carefully and avoid extended operation in places accommodating human beings.
